PROJECTS

MOVIE LIBRARY

Jan 2024

- It is used to catalog and organize movie collections, making it easy to keep track of movies they own. They can buy it also.
- I used HTML, CSS, and JavaScript for frontend development.
- On the backend, I utilized Java Servlets to handle user requests and implemented server-side logic.
- One of the project's key highlights is the integration of Hibernate and MySQL for efficient data persistence and retrieval.

EVENT MANAGEMENT

Jan 2024

- This project is mainly created for Managing the Events like Birthday, Marriage, Engagement etc.
- We can select Services also for the Events like Catering Service, Music and Dance, Photography etc.
- This project is fully based on Backend, here I used Hibernate as a ORM tool and Mysql.

SIMPLE CALCULATOR

Dec 2023

- This Calculator is used to perform Arithmetic Operations like addition, subtraction, multiplication, division.
- In this project I used HTML, CSS for designing and I used JAVASCRIPT for logic.

ADDITIONAL

Technical Skills

➤ JAVA

- Conditional Statements
- Strong in OOPS concept
- Java Collection
- Exception Handling

➤ SQL

- Strong in Filter Conditions
- Proficient in Writing SQL Queries
- Knowledge in DDL, DML, DQL

➤ WEB TECHNOLOGY

- Html
- Css
- JavaScript

➤ ADVANCE JAVA

- Knowledge in Servlets
- Knowledge in JDBC

Soft Skills

- Good Logical Thinker
- Quick Learner

Languages

Good in English
Conversational Proficiency in Tamil
